

Welcome! 🙌 What do you...

- already know about accessibility?
- already know about accessibility testing?
- want to get out of the workshop?

Pick one (or more!)

Metagenda

1. One minute intros
2. Quick bit of testing
3. Agenda for the day
4. Everything else

Hi, I'm Steve.

- **Front-web developer (few decades)**
- **Accessibility human (few years)**
- **Intopia human (few months)**

One minute (ish) intros

- Quick go around your table
- Name, job title / company / something
- Your warm-up question and answer

Anything cool / weird come up?

- Same questions?
- Same answers?
- One of you is in the wrong workshop?

**Please join the
Accessibility workshop channel,
Software Testing New Zealand
Discord group**

Quick bit of testing

- 10 minutes of `axe` to get started!
- Test the last thing you worked on.
- Install it, run it, read it.

How was that?

- What did you find?
- Anything unexpected?

- **09 : 30 — Session 1** 🙌 (you are here)
- **10 : 45 — Morning tea**
- **11 : 15 — Session 2**
- **12 : 30 — Lunch**
- **13 : 30 — Session 3**
- **14 : 45 — Afternoon tea**
- **15 : 15 — Session 4**

Session structure (ish)

- a little talk from me;
 - about an hour doing stuff;
 - a little bit of discussion;
- ⚠ Session 4 will include 10 minutes for feedback for Steve and for NZTC

**Busting barriers with
ARIAs, axes, and audits**

" This is not accessible."

" This is 100% accessible."

💡 The big idea 💡

**Think more broadly,
in a more human-centred way.**

1. Not-separate

**Common, core,
human, tasks**

2. Not-strict

The Social Model:
Ability + Barrier =
Disability

**3. Not-singular
(also: not-static)**

**“It doesn't have to be perfect,
just a little bit better than yesterday”**

- Léonie Watson

**(member of W3C Advisory Board,
founder of TetraLogical, and more)**
